  Git, Github

Projects

Capital Quiz

- Web application created using HTML, CSS, and JavaScript.
- With DOM manipulation through JavaScript, I was able to create a quiz application that would track your score and give you feedback in real time.

Recipe Application

- Full stack web application using Node.js, Express, and MongoDB.
- This app allows the user to post recipes online and share it.

Dessert Recipe Sharing

- Full stack web application created using React, Node.js, HTML, and CSS.
- As the scrum master of the group, I delegated tasks each day and led morning meeting to see if there were any glaring issues from the day before.
- Has full CRUD ability where user can post and share their favorite desserts.
